Central and North Florida Regional Turf Spray Program

Non-Dormant Bermudagrass – Warm Season

For tees, greens or fairways, superintendents trust BASF for the most effective high-quality golf solutions. Proven BASF innovations deliver superior performance in all geographical regions and climates, especially during peak stress times. With a specific protocol for each area of the country, the BASF Regional Turf Spray Program is specially designed to provide proven disease control and produce stronger roots, greater stress tolerance, higher resiliency and increased growth efficiency. The result is championship conditions, all year long.

Central and North Florida Non-Dormant Bermudagrass

Long, cool springs can affect turfgrass growth in this region, though spring and fall tend to remain temperate. While turfgrass does not go dormant in winter, temperatures can dip below the 55-degree growing temperature for bermudagrass. Winter is considered the dry season, but unexpected weeks of clouds and rain sometimes occur. Summer months are humid, and the tropical season in late July and August can be wet and very cloudy for weeks at a time.

■ *Holiday Spray Program*

¹ SLR = Standard Local Rate for the products shown; consult local extension recommendations in your region.

² **Lexicon Intrinsic** brand fungicide can be applied 4 times during any calendar year not to exceed 1.95 fl oz per 1,000 sq ft (85 fl oz per acre).

³ Subject to a BASF Recommendation under FIFRA 2(e) for fairy ring, *Bipolaris* leaf spot and *Rhizoctonia* leaf spot and leaf and sheath spot in certain states. See www.CDMS.net for BASF Technical Information Bulletin.

Product timing is a suggestion only; optimize application for local weather and field conditions. Confirm active status of product registration in your state before using; not all products are registered in all states. Application Rate/1,000 sq. ft. is based on maximum label rate or range. Claims related to root strength, stress tolerance, resiliency and growth efficiency are specific to those BASF products containing pyraclostrobin, as shown.

Always read and follow label directions.
