

South Florida, Puerto Rico and Hawaii Regional Turf Spray Program

Bermudagrass – Warm Season

For tees, greens or fairways, superintendents trust BASF for the most effective high-quality golf solutions. Proven BASF innovations deliver superior performance in all geographical regions and climates, especially during peak stress times. With a specific protocol for each area of the country, the BASF Regional Turf Spray Program is specially designed to provide proven disease control and produce stronger roots, greater stress tolerance, higher resiliency and increased growth efficiency. The result is championship conditions, all year long.

Bermudagrass

South Florida, Puerto Rico and Hawaii

These regions offer optimum year-round temperatures for bermudagrass. Greatest stresses include extended cloud cover, tropical moisture and heavy rounds of concentrated play in season. Milder air from the coasts of South Florida and Puerto Rico mitigates the high humidity in these areas, where mid- to late-summer rain can occur daily. Hawaii's rainfall depends on the season, the island and whether it's the leeward or windward side.

■ **Holiday Spray Program**

¹ SLR = Standard Local Rate for the products shown; consult local extension recommendations in your region.

² **Lexicon Intrinsic** brand fungicide can be applied multiple times during any calendar year not to exceed 1.95 fl oz per 1,000 sq ft (85 fl oz per acre).

³ Subject to a BASF Recommendation under FIFRA 2(ee) for fairy ring, *Bipolaris* leaf spot and *Rhizoctonia* leaf spot and leaf and sheath spot in certain states. See www.CDMS.net for BASF Technical Information Bulletin.

⁴ Mini ring is leaf and sheath spot caused by *Waitea circinata* var. *zeae* *Chrysorhiza zea* or var. *oryzae*/*Chrysorhiza oryzae* formerly known as *Rhizoctonia zea* and *Rhizoctonia oryzae*.

Product timing is a suggestion only; optimize application for local weather and field conditions. Confirm active status of product registration in your state before using; not all products are registered in all states. Application Rate/1,000 sq. ft. is based on maximum label rate or range. Claims related to root strength, stress tolerance, resiliency and growth efficiency are specific to those BASF products containing pyraclostrobin, as shown.

Always read and follow label directions.
