

Texas Gulf Coast and Florida Panhandle Regional Turf Spray Program Non-Dormant Turfgrass – Warm Season

For tees, greens or fairways, superintendents trust BASF for the most effective high-quality golf solutions. Proven BASF innovations deliver superior performance in all geographical regions and climates, especially during peak stress times. With a specific protocol for each area of the country, the BASF Regional Turf Spray Program is specially designed to provide proven disease control and produce stronger roots, greater stress tolerance, higher resiliency and increased growth efficiency. The result is championship conditions, all year long.

Texas Gulf Coast and Florida Panhandle Non-Dormant Turfgrass

The climate of the Gulf Coast significantly affects this region, which experiences high humidity for more months of the year than any other part of the country. While turf does not go dormant, it can go off color when infrequent cold temperatures cause stressful growing conditions. The area holds a lot of moisture, with or without tropical storms, which tend to be fast-moving. The temperature often remains below 100 degrees, but feels hotter due to the humidity.

■ *Holiday Spray Program*

¹ SLR = Standard Local Rate for the products shown; consult local extension recommendations in your region.

² **Lexicon Intrinsic** brand fungicide can be applied multiple times during any calendar year not to exceed 1.95 fl oz per 1,000 sq ft (85 fl oz per acre).

³ Subject to a BASF Recommendation under FIFRA 2(ee) for fairy ring in certain states. See www.CDMS.net for BASF Technical Information Bulletin.

Product timing is a suggestion only; optimize application for local weather and field conditions. Confirm active status of product registration in your state before using; not all products are registered in all states. Application Rate/1,000 sq. ft. is based on maximum label rate or range. Claims related to root strength, stress tolerance, resiliency and growth efficiency are specific to those BASF products containing pyraclostrobin, as shown.

Always read and follow label directions.
