

## Central Transition Zone Regional Turf Spray Program

### Bermudagrass and Zoysiagrass – Warm Season

With this geography-specific spray program, superintendents have a customized rotation management plan for disease control. Be sure and include these important rotations in your plan and have strong, resilient turf all year long.

- Intrinsic® brand fungicides provide a strong foundation of plant health benefits, including broad-spectrum disease control, stronger roots and higher stress tolerance.
- The turf-safe Maxtima® fungicide is a DMI that delivers long-lasting disease control of key diseases at any temperature for rotation flexibility and year-round confidence.
- The broad-spectrum DMI power of Navicon® Intrinsic® brand fungicide controls more than 20 major diseases while improving overall turf health from root to blade.

# Central Transition Zone Bermudagrass and Zoysiagrass

AL, AR, MS, OK, TN, TX

Bermudagrass greens go dormant in most areas of this region with very cold and icy conditions for some of the winter. Extended wet weather can also dominate the winter months, while warm conditions can develop slowly. This region can vary widely from hot and very dry, to cloudy and wet. Humidity increases farther south, and can last through the summer and into the fall.

Multiple products listed per month are meant to be a rotational option to control additional disease pressure that may occur.

<sup>1</sup> Standard local rate for the products shown; consult label and/or local extension for regional recommendations

<sup>2</sup> Recommended application spray volume is 2-4 gallons/1000ft<sup>2</sup>. Provide 1/4" irrigation post application. To improve hydrophobic conditions and improve fungicide efficacy, BASF recommends regular soil wetting agent applications during the growing season.

Product timing is a suggestion only; optimize application for local weather and field conditions. Confirm active status of product registration in your state before using; not all products are registered in all states. Application Rate/1,000 sq. ft. is based on maximum label rate or range. Plant health benefit related to root strength, stress tolerance, resiliency and growth efficiency are specific to those BASF products containing pyraclostrobin.

Always read and follow label directions.
