

Finale[®] XL T&O

Herbicide

Fast, non-selective control with precision accuracy

Finale XL T&O herbicide is BASF's newest non-selective, contact herbicide formulation with enhanced active ingredient loading. It has pinpoint accuracy and delivers fast control of the toughest weeds at lower use rates than prior formulations.

It's the perfect tool for spot treatments and precision edging along cart paths, fences and landscape beds.

 **BASF**

We create chemistry

Faster Activity

Fast-acting knockdown of troublesome weeds

Precision Accuracy

Contact activity only affects what you spray with no spread to surrounding turf

Controls Toughest Weeds

Controls winter broadleaf weeds and herbicide-resistant Poa annua in dormant warm-season turf

Glyphosate Alternative

Excellent alternative to glyphosate: faster results and lower A.I. per acre

Finale XL T&O herbicide is a great alternative to glyphosate products. Contact activity allows for worry-free, precision edging and minimal off-target issues. Weed growth is stopped within hours-to-days of application with faster symptomology, particularly during cool weather.

The accuracy you want, the speed you need

- Better control of broadleaf weeds
- Rainfast in as little as 30 minutes
- More timing flexibility on dormant bermudagrass
- Will control sucker growth with no known negative effect to main plant
- Excellent tank mix partner with preemergent herbicides for residual control

Where to use Finale XL T&O herbicide

- 1 Cart path edges
- 2 Base of trees
- 3 Pond edges
- 4 Rough and native areas (spot treatment)
- 5 Pump house
- 6 Bunkers
- 7 Fence lines
- 8 Gravel walkways and parking areas
- 9 Landscape beds

HRAC Group	Active Ingredient (%)	Rate Range (% solution)	Rate Range	Formulation	Packaging	Top Weeds
10	glufosinate-ammonium 24.5%	0.4 to 1.25*	27 to 82 fl oz / A*	Soluble concentrate	2 x 2.5 Gal	Crabgrass, dandelion, clover, plantain, and nimblewill

*Finale XL T&O herbicide's rate range is a function of the size of the weed; maximum rates are for large weeds and brush and perennial grasses. Maximum rate is 5.125 pints per acre. Add NIS and/or AMS for better control of perennial grasses, brush, and large weeds.

Always read and follow label directions.
