

# Holiday Spray Program – Warm Season Guide

The BASF Holiday Spray program is an easy-to-follow agronomic program designed to help your course thrive under the toughest conditions. Apply **Intrinsic**® brand fungicides throughout the year to protect your warm-season greens, fairways and tees from heavy disease pressure and winter stressors like reduced sunlight and cooler temperatures.

Apply Intrinsic brand fungicides to fairways, tees and surrounds ahead of aerification to protect turf from disease and summer stress. Make a second application in late summer to provide tropical storm protection and plant health foundation.

**May 1 - July 31**  
**Lexicon Intrinsic** brand fungicide  
**Navicon Intrinsic** brand fungicide  
**Honor® Intrinsic** brand fungicide  
- Ahead of aerification

**August 15 - September 15**  
**Navicon Intrinsic** brand fungicide  
- Ideal for take-all root rot  
- Tropical storm protection
