Pendulum® AquaCap

Herbicide

Pendulum AquaCap herbicide:

Preemergent control of grassy and broadleaf weeds in tees, fairways, roughs, green surrounds, native areas and landscapes. Applied in the spring of the year prior to weed germination, Pendulum AquaCap herbicide will control crabgrass, goosegrass, johnsongrass (from seed), foxtail, barnyardgrass, fall panicum and many other grassy weeds. Pendulum AquaCap herbicide will also control numerous broadleaves such as lambsquarter, pigweed, smartweed, spurge and others.

Tower®

Herbicide

Tower herbicide:

Shoot inhibiting preemergent on warm season turf is highly effective for the control of yellow nutsedge and annual sedges along with numerous grassy and broadleaf weeds to include goosegrass, crabgrass, field sandbur and spurge. Can be used on tees, fairways, green surrounds, roughs, native areas and landscapes.

Basagran® T&O

Herbicide

Basagran T&O herbicide:

Postemergent control of yellow and annual nutsedge and several troublesome broadleaves. These include Canada and musk thistle, ragweed, wild mustard, dayflower and several others.

Drive® XLR8

Herbicide

Drive XLR8 herbicide:

Postemergent control of numerous grassy weeds along with several broadleaves on tees, fairways, green surrounds, roughs and native areas. Drive XLR8 herbicide will control barnyardgrass, foxtail, crabgrass, broadleaf signalgrass, field bindweed and clover.

Pylex®

Herbicide

Pylex herbicide:

Postemergent control of many annual and perennial grasses in addition to numerous broadleaf weeds. Pylex herbicide can eliminate large unsightly weeds that can overtake your golf course like goosegrass, crabgrass, foxtail, barnyardgrass, Bermudagrass, johnsongrass, Japanese stiltgrass, morninglory, ragweed, lambsquarter, marestalk, thistle and pigweed.

Finale® XL T&O

Herbicide

Finale XL T&O herbicide:

Non-selective control of many annual and perennial grasses and broadleaves. It is ideal to edge bunkers, cart paths and control weeds under fence lines in gravel areas and in landscape beds. Finale XL T&O herbicide can be used in combination with Pendulum AquaCap herbicide or Tower herbicide for pre and postemergent weed control.

Segment® II

Herbicide

Segment II herbicide:

Excellent choice for the postemergent control of grassy weeds in landscape beds, wildflower areas and fine fescue native areas. Segment II herbicide will control barnyardgrass, crabgrass, johnsongrass, tall fescue, wild oats, quackgrass and many more grassy weeds. Segment II herbicide is safe to broadleaved plants.
